

Nirwan Rasyid Ridlo

Bandung, Indonesia | 089527340406 | nirwanrasyidridlo@gmail.com | [LinkedIn Profile](#)

Passionate about contributing to the advancement of technology, a Software Developer with growing full stack experience and a strong specialization in Frontend Development, gained across personal, team, and professional projects, including a hands-on internship and full stack development work building analytics, tracking, and management applications. The tech stack includes JavaScript/Node.js (React.js, Next.js, Nest.js), PHP (Laravel), and Python for backend and web development, along with Dart and Kotlin (Flutter and Android Studio) for mobile app development. Comfortable working in an AI-assisted development workflow, using AI tools to accelerate the software development lifecycle, from prototyping to production-ready implementation, while maintaining code quality, architecture standards, and thorough review. Focus on creating innovative, user-friendly, and high-performance solutions.

EDUCATION

UIN SUNAN GUNUNG DJATI BANDUNG

Aug 2022 - Present

Informatics Engineering Student – GPA: 3.76

Relevant Coursework: Database Management, Computer Networks, Mobile Application Development, Web Application Development, Human-Computer Interaction, Artificial Intelligence, Software Project Management

EXPERIENCE

Full Stack Developer — RAPHONECELL Electronics

Jan 2026 – Apr 2026

Bandung, ID

- Developed a multi-platform counter management and service application to digitize sales, repair-service tracking, and inventory operations.
- Built the backend using Nest.js, the web dashboard using React, and the companion mobile app using Flutter.
- Worked across the full stack, from API design and database structure to end-user interfaces on both web and mobile.
- Leveraged AI-assisted development tools (Claude Code, Gemini, ChatGPT) to accelerate implementation while maintaining production-ready code quality.

Frontend Programmer Intern — PT LEN INDUSTRI (PERSERO)

Sep 2025 – Dec 2025

Portfolio Optimization Division, Bandung, ID

- Completed a 4-month internship placed within the Portfolio Optimization division, focused on designing and building frontend prototypes.
- Designed and developed an analytics dashboard prototype for monitoring and visualizing company assets.
- Built the frontend prototype for a mobile application, currently under development at Len, for tracking and monitoring electric motorcycles in real time.
- Collaborated with cross-functional teams to translate business monitoring requirements into functional, user-friendly interfaces.

COUNTER STAFF & ELECTRONICS REPAIR TECHNICIAN — RAFFID CELLULAR

Jan 2024 – Feb 2024

Bandung, ID

- Worked at a mobile phone counter, managing sales and providing repair services for electronics, including phones, tablets, and laptops.
- Gained hands-on experience in diagnosing and fixing hardware and software issues, enhancing technical troubleshooting skills.

ORGANIZATIONAL EXPERIENCE

PDD (Publication, Documentation & Design) COMMITTEE — TILIK LENSA SAINTEK

Apr 2024

Scientific Research Competition Committee, Bandung, ID

- Served on the PDD committee for Tilik Lensa Saintek, a scientific research competition event.
- Supported publication, documentation, and design needs for the competition's promotional and event materials.

PROJECTS

Electric Motorcycle Tracking App – Mobile App (Len Internship)

Sep 2025 – Dec 2025

A mobile application, developed during the internship at PT LEN Industri, for real-time tracking and monitoring of electric motorcycles currently under development at Len.

Technologies Used: Flutter | Google Maps API (location tracking integration)

- Built the mobile frontend with Flutter for a cross-platform tracking experience.

- Integrated the Google Maps API to display and track real-time vehicle location.
- Project Repository: github.com/Syidwan/Sihemat-v3

Asset Monitoring Dashboard – Web App (Len Internship)

Sep 2025 – Dec 2025

An analytics dashboard built for the Portfolio Optimization division to monitor and visualize company assets, supporting data-driven decision-making.

Technologies Used: React.js

- Designed and built interactive data visualizations for real-time asset monitoring.
- Translated portfolio and asset data into a clear, user-friendly analytics interface.
- Project Repository: github.com/Syidwan/insight-loom-desk

Digital Invitation – Website

Jul 2024 – Sep 2024

A website for creating personalized wedding invitations with interactive animations and a wide range of customizable templates.

Technologies Used: Frontend – React.js, Tailwind CSS, Framer Motion | Backend – Next.js | Database – Prisma (ORM) | UI Components – DaisyUI, Shadcn-UI

- Frontend Development: Built an interactive user interface with animations.
- Backend Services: Developed scalable API services.

Digital Clinic Service – Website

Mar 2024 – May 2024

A web application that streamlines the management of clinic appointments and patient data, creating an efficient platform for clinics to manage operations.

Technologies Used: Laravel, Bootstrap | Laragon | MySQL

- Frontend Development: Built a user-friendly interface for patients and staff.
- Backend Development: Created secure, scalable services to handle clinic operations.
- Project Repository: github.com/Xinqi04/RPL

Project Assistant Web – Website

Dec 2024 – Jan 2025

A kanban-style project management web application designed to help individuals and teams visualize workflow in columns, with drag-and-drop tasks across stages for better organization and progress tracking.

Technologies Used: Next.js, React.js | Prisma (ORM) | Clerk-Provider (Authentication)

- Interactive Kanban board for task management.
- Real-time progress tracking.
- User and Organization Authentication.

TECHNICAL SKILLS

Programming Languages: HTML/CSS, Java, JavaScript, TypeScript, Python (Data Science), Kotlin, Dart

Human Languages: Indonesian (Native), English (Conversational: able to understand and speak, not yet fluent)

Frameworks – Web: React.js, Next.js, Nest.js, Laravel, Tailwind CSS

Frameworks – Mobile: Flutter, Android Studio

Database: MySQL, PostgreSQL

AI-Assisted Development: Claude Code, Gemini, Google AI Studio, Antigravity, ChatGPT, used for rapid prototyping, code generation, debugging, and accelerating production-ready delivery

Relevant Skills: Web Performance, Clean Code, UI/UX Design

CERTIFICATIONS

- Frontend Programmer Internship Certificate – PT LEN Industri (Persero) — Dec 2025
- NDG Linux Essentials – Cisco Networking Academy — Jul 2024
- 3rd Place, UI/UX Competition – IT FAIR XIV, HIMA Teknik Informatika UIN Sunan Gunung Djati — 2025
- Belajar Dasar Pemrograman Web – Dicoding — Sep 2024
- Belajar Dasar Pemrograman JavaScript – Dicoding — Sep 2024
- Memulai Pemrograman Dengan Java – Dicoding — May 2024
- Database Programming with SQL – Oracle — Oct 2024
