Nirwan Rasyid Ridlo

Bandung, Indonesia | 089527340406 | nirwanrasyidridlo@gmail.com | Linkedin | nirwanrr.my.id

Results-driven Software Engineer and AI/ML Engineer with hands-on full-stack, mobile, and MLOps experience across 5+ end-to-end production and enterprise prototype systems. Proven track record in building scalable web and mobile applications using React.js, Next.js, Nest.js, and Flutter, alongside deploying continuous machine learning and NLP pipelines with Python, PyTorch, and Hugging Face. Adept at leveraging AI-assisted engineering workflows to accelerate delivery cycles while maintaining strict code quality, clean architecture, and measurable business impact.

EDUCATION

UIN Sunan Gunung Djati Bandung — Bachelor of Informatics Engineering *Aug 2022 – Oct 2026*

GPA: 3.77

Relevant Coursework: Database Management, Computer Networks, Mobile Application Development, Web Application Development, Human-Computer Interaction, Artificial Intelligence, Software Project Management

EXPERIENCE

Full Stack Developer — RAphonecell Electronics *Jan 2026 – Jul 2026*

Bandung, ID

- Architected and deployed a 3-in-1 multi-platform POS and service management ecosystem (Web, REST API, and Mobile), digitizing 100% of daily sales, repair-ticket tracking, and inventory workflows to eliminate manual paper logs.
- Engineered a modular Nest.js + PostgreSQL backend, a responsive React/Next.js dashboard, and a companion Flutter mobile app supporting real-time stock synchronization and multi-step service status tracking.
- Designed end-to-end RESTful APIs and relational database schemas across 5+ core operational modules (POS checkout, repair queue, spare-part inventory, customer records, and daily financial reporting).
- Integrated AI-assisted engineering workflows (Claude Code, Gemini, ChatGPT) into the SDLC, accelerating feature prototyping and full-stack delivery by ~40% while maintaining production-grade TypeScript code quality.

Software Engineer Intern — PT LEN Industri (Persero) *Sep 2025 – Dec 2025*

Portfolio Optimization Division, Bandung, ID

- Delivered 2 enterprise-grade web and mobile software prototypes within a 4-month internship in the Portfolio Optimization division, supporting digital transformation initiatives across 5 DEFEND ID state-owned defense holding companies.
- Designed and built an interactive Asset Optimization Analytics Dashboard featuring 6+ KPI chart types and multi-level drill-down modals to centralize portfolio visibility and speed up executive decision-making.
- Developed a real-time EV motorcycle fleet tracking mobile prototype in Flutter with live GPS telemetry, route-history replay, and safety compliance monitoring, reducing manual fleet status checks.
- Collaborated with cross-functional engineering and business stakeholders through weekly sprint reviews, translating complex asset-monitoring requirements into intuitive UI/UX workflows with a 100% on-schedule milestone completion rate.

Counter Staff & Electronics Repair Technician — Raffid Cellular *Jan 2024 – Feb 2024*

Bandung, ID

- Managed daily counter sales and performed end-to-end hardware/software diagnostics for 15+ smartphones, tablets, and laptops per week, maintaining high customer satisfaction and repeat service trust.
- Resolved 90%+ of common mobile and laptop hardware/OS failures on first-time repair, reducing average device turnaround time and strengthening practical troubleshooting skills.

ORGANIZATIONAL EXPERIENCE

PDD (Publication, Documentation & Design) Committee — Tilik Lensa Saintek *Apr 2024*

Scientific Research Competition Committee, Bandung, ID

- Coordinated publication, event documentation, and visual branding for Tilik Lensa Saintek, a faculty-wide scientific research competition engaging 100+ student participants and attendees.
- Designed and delivered 15+ digital promotional assets, event banners, and documentation media on schedule, boosting event visibility across campus social channels.

PROJECTS

FinBERT MLOps — Financial News Sentiment & Drift Monitoring App *Jul 2026 – Oct 2026*

End-to-end MLOps pipeline and web app for Indonesian financial news sentiment analysis, addressing quarterly data drift via automated monitoring and LoRA continual learning.

Technologies Used: Python, PyTorch, Hugging Face (FinBERT, PEFT/LoRA, Hub), Streamlit, MLflow, ZenML, Evidently AI, Plotly

- Built an automated drift monitoring and continual retraining pipeline comparing Sliding Window, Experience Replay, Cumulative LoRA, and Unsupervised Domain Adaptation (UDA) to keep sentiment predictions accurate as market topics shift.
- Engineered a fault-tolerant Indonesian-to-English translation pipeline with local financial term protection (IHSG, OJK, BI Rate, APBN) and deployed an interactive multi-tab Streamlit dashboard integrated with Hugging Face Hub.
- Live Demo: finbert-indonesia-news-fse64bps3jmca7lujlgubb.streamlit.app | Repo: github.com/Syidwan/finbert-mlops

Ostace POS — Web App (RAphonecell Electronics) *Jan 2026 – Jul 2026*

Full-stack Point of Sale (POS), repair-service tracking, and inventory management system built for RAphonecell Electronics, replacing manual bookkeeping across 100% of counter operations.

Technologies Used: React, Next.js, TypeScript, Tailwind CSS, Nest.js, PostgreSQL

- Built the responsive Next.js web dashboard and Nest.js/PostgreSQL service workflow across 5+ core modules, cutting transaction recording and repair-status lookup time to seconds.
- Live Demo: ostace-pos.vercel.app

SiHemat — EV Fleet Tracking App — Mobile App (Len Internship) *Sep 2025 – Dec 2025*

Real-time EV motorcycle fleet tracking mobile application prototype built for PT LEN Industri (Persero), featuring live GPS telemetry, route replay, safety monitoring, and corporate fleet compliance.

Technologies Used: Flutter, Dart, Google Maps API, Firebase, Next.js, TypeScript

- Developed the cross-platform Flutter mobile prototype and interactive Next.js web showcase featuring 4+ core telemetry views (live map, route replay, battery/safety alerts, and fleet compliance).
- Integrated Google Maps API and Firebase real-time streams to track vehicle coordinates with sub-second UI updates.
- Live Demo: mockup-intern-project.vercel.app | Project Repository: github.com/Syidwan/Sihemat-v3

DEFEND ID — Asset Optimization Dashboard — Web App (Len Internship) *Sep 2025 – Dec 2025*

Enterprise asset monitoring and optimization analytics dashboard for DEFEND ID holding companies (LEN, Pindad, Dahana, Dirgantara, PAL), supporting data-driven decision-making.

Technologies Used: React, TypeScript, Tailwind CSS, Recharts, Vite, Supabase, Radix UI

- Built 6+ interactive Recharts/Radix UI visualizations (donut/pie breakdowns, utilization trends, and drill-down modals) consolidating asset metrics across 5 DEFEND ID holding companies (LEN, Pindad, Dahana, Dirgantara, PAL).
- Transformed multi-company portfolio datasets into a unified, responsive dashboard interface that streamlines executive asset evaluation.
- Live Demo: insight-loom-desk.vercel.app | Project Repository: github.com/Syidwan/insight-loom-desk

PAW — Project Assistant Web — Website (Academic Coursework) *Sep 2024 – Dec 2024*

Academic project management workspace built at UIN Sunan Gunung Djati Bandung featuring Kanban boards, real-time team collaboration, priority/deadline tracking, and role-based access control (RBAC).

Technologies Used: Next.js, React, TypeScript, Tailwind CSS, Vercel

- Engineered 10+ reusable React/TypeScript UI components and interactive Kanban workflows supporting seamless multi-user team collaboration.
- Live Demo: paw-kappa.vercel.app

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python (Data Science, NLP & MLOps), Dart, Kotlin, PHP, Java, SQL, HTML/CSS
Human Languages: Indonesian (Native), English (Conversational: able to understand and speak, not yet fluent)
Frameworks & ML/MLOps: React.js, Next.js, Nest.js, Laravel, Tailwind CSS, PyTorch, Hugging Face (FinBERT, LoRA), Streamlit, MLflow, Evidently AI, ZenML
Frameworks – Mobile: Flutter, Android Studio
Database: MySQL, PostgreSQL
AI-Assisted Development: Claude Code, Gemini, Google AI Studio, Antigravity, ChatGPT, used for rapid prototyping, code generation, debugging, and accelerating production-ready delivery
Relevant Skills: Full-Stack Development, MLOps & Continual Learning, RESTful API Design, Web Performance, Clean Code, UI/UX

CERTIFICATIONS

- On The Job Training Certificate (Grade A) – PT LEN Industri (Persero) — Dec 2025
- Training ICT: Microsoft Office Specialist (Excel) – PTIPD UIN SGD Bandung & Lumina Eka Optima — Nov 2025
- 3rd Place, UI/UX Competition – IT FAIR XIV, HIMA Teknik Informatika UIN Sunan Gunung Djati — 2025
- Database Programming with SQL – Oracle Academy — Oct 2024
- Database Design – Oracle Academy — Sep 2024
- Belajar Dasar Pemrograman Web – Dicoding — Sep 2024
- Belajar Dasar Pemrograman JavaScript – Dicoding — Sep 2024
- Intro to Software Engineering – RevoU — Jun 2024
- Memulai Pemrograman Dengan Java – Dicoding — May 2024
